

NEWB TOKEN WHITEPAPER

Introduction

NEWb is a deflationary token built on BSC. We believe that providing new investors with education and support through community will empower their investment decisions. NEWb aspires to be the one-stop-shop for crypto education. Most altcoin communities' focus on educating and empowering their investors are little to none. Critically, many recent altcoins have obliterated the trust of veteran and new investors alike by dumping profits all at once. This is known as a rugpull. NEWb aims to reestablish trust and strengthen investor confidence by implementing a fully functional website that features an earn-while-you-learn concept, a resource center for crypto trading courses, rugpull education, voters rights, a community driven to help one another along their crypto journey and transparency. No investor left behind!

Earn While You Learn

Users will be able to watch introductory and educational videos on crypto. A short quiz will follow each video and users will be rewarded in NEWb Token via their score. Each score range equates to different quantities of NEWb rewards: The higher the score, the higher the NEWb Token rewards!

Videos will range from a simple introduction to crypto (i.e. what is crypto?, what is an exchange?, trading terms such as bearish/bullish), how to create different orders on exchanges (i.e. buy/sell orders, limit orders, stop limit orders and stop market orders), to reading charts (i.e. candles, wicks, the dip, open/close, volume, change%).

Learn from the Best

The learning resource center will feature myriad, well-reviewed, well-respected crypto traders and mentors. Courses will range from beginner to advanced and will feature a preview video for each course as well as a link to the previewed trader/mentor course.

Rugpull Education

The website will feature a section of informative warning signs in rugpull operations. Users will be able to prepare themselves as best as they can to avoid investing their money into coins that plan to dump once the coin has increased in value.

Power to the NEWbs!

Polls will be administered in the community chat to give members a voice in NEWb Token's decisions. Each poll will be introduced with an opening and closing date/time for voters to participate. Members are always encouraged to share ideas for polls!

Help is on the Way

The NEWb Community is one of support and encouragement. Any and all in the crypto verse are encouraged to participate with a helping hand in mind. Our community strives to provide answers to questions and helpful, accurate and current crypto information to its peers. From beginner to veteran, we constantly want our NEWbs to stay involved so we can help each other!

Transparency

In addition to giving members a voice, our polls also keep members in the loop on NEWb Token's future decisions. To ascertain our transparency, our contract addresses are available to the public and can be tracked on BSC Scan. Our holder's security is our top priority thus, we have submitted our contract for 2 audits to date!

Token Metrics

Name: Newb Token	Type: BEP20
Symbol: NEWB	Platform: BSC Network
Initial Supply: 10,000,000,000,000	5% Liquidity Distribution Fee
Decimals: 9	1% Redistribution

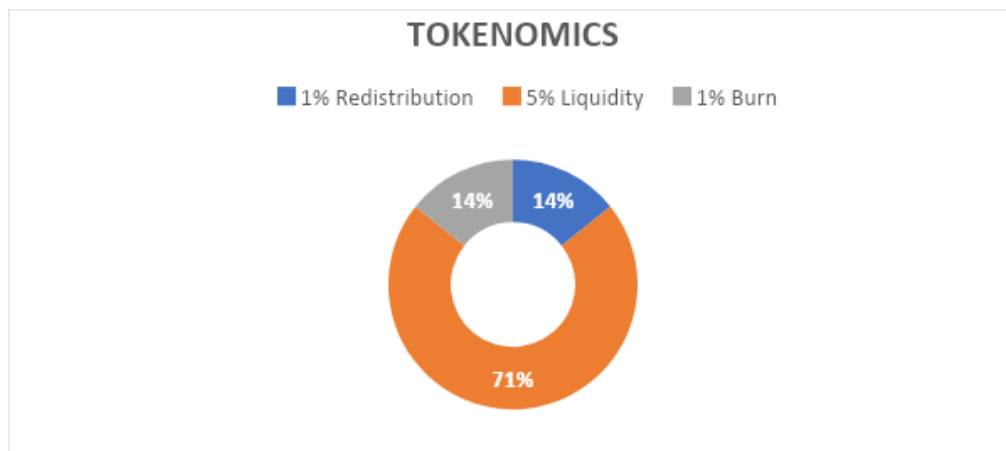

Token Contract Address: 0x982c05a6c9ce6107ccbc325ec3123f2d558 a4904	1% Burn
--	----------------

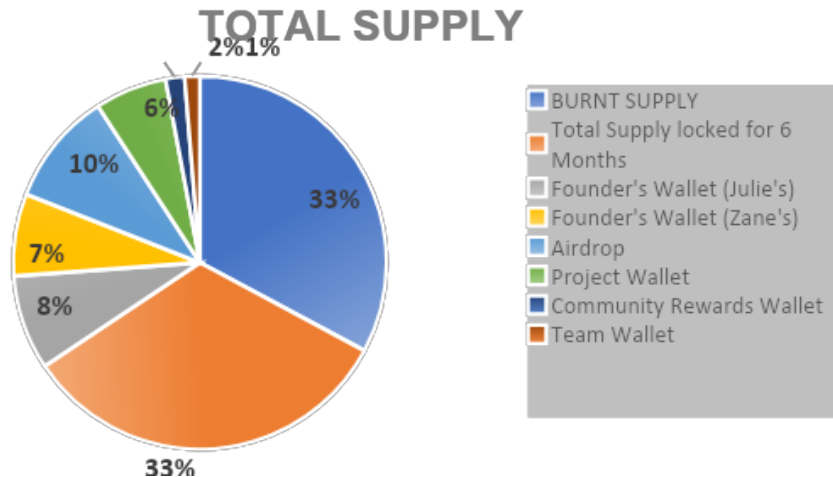

Various altcoins have been created and have experienced an enormous amount of controversy surrounding the inevitable bubble. This inherent lack of stability could make a significant change in an asset which this project can resolve. A total of **7% is taken from each transaction** as described below.

A portion of the transaction fee tax of **1% will be allotted and redistributed proportionally among holders**. This can be treated as an incentive to the community for holding their NEWb. This can prevent the pump and dump scheme, solving the current problem with existing cryptocurrencies in the market. It is important to note that holders will be getting rewards for all transactions that take place on the network.

Another **1% is taken away from every transaction to burn**, resulting in an increase of the price, to rise over time. This is the process of removing coins permanently from circulation, reducing the total supply of NEWb therefore, reinforcing the remaining value to improve per share.

5% of each transaction is added to the liquidity pool. Currently, initial liquidity is locked for 6 years until 1st of May 2027.

Manual Burns

At the time of writing, NEWbOfficial team has **burned 30%** of the current supply. It can be tracked on BSC Scan through this address:

- 0x00000000000000000000000000000000dead.

This manual burn is executed by the NEWbOfficial team based on every milestone the community has reached. This strategy mitigates the pressure from the community inevitably done by panic sellers when the price collapses.

Since the launching of NEWb, we have **allocated 10%** for our airdrop campaign. This was done to attract and reward the community for participating during the early release of NEWb. This airdrop wallet can also be tracked through this contract address:

- 0x163212c9cb6b7111768a97319172e62f0f2d50af.

Social Media Expansion & Marketing

Our main purpose is to create an exclusive platform/application that can help educate and support investors from different walks of life to attain financial freedom.

NEWb is community driven. The **market allocation fund is 1.2% of the total supply** which was agreed upon and decided by the community through their votes. This can be found through:

- 0xA9e546B0d471c4281b2d6A9821a1aD916C65a72D.

With this, our objective to expand our network is possible through social media by attracting new investors and constantly updating our NEWbs of our progress.

Community Rewards

Founders are determined to establish a website that will have multiple purposes and functionalities. A fundamental use will be to train and prepare Newbs in their crypto journey while being rewarded via NEWbToken for taking the time to educate themselves. Crypto enthusiasts and content creators are also to be compensated for their time and effort.

A percentage of **1.5% of the total supply will be used for learn and earn concepts**. The contract address for this reward wallet can be tracked here:

- 0x6ff24d88cc319a28fea966af0f8257e73fdf1146

A supply of 14% will go straight to the founders' personal wallets. Founders' wallet addresses are:

- 0x0827ea3299461c22d19c73727259ae8d16b698a1
- 0x78c162fffd5d39ca07da8ffcaf4f43f137cc6e

Due to our goal of having multiple functionalities for our website and mobile application, an allotment of **5.7% will be dedicated to the project's Research and Development (R&D)**.

R&D fund address:

- 0xa9c3ca4aa78e76ece6b8610c7674d1ff6e058f7d

Moving forward, we will be focusing on the advancement of encryption and visualization techniques to ensure our NEWb's financial information is secured, making the community safe.

Exchange Listings

Currently, NEWb Token is available on PancakeSwap and will be available on multiple exchanges in the coming year. PancakeSwap is a decentralized exchange created on Binance Smart Chain, it boasts fast transactions and reduced gas fees making it inexpensive and easier for our investors to acquire tokens.

Contract

The NEWbOfficial Team will be updating the Smart contract NEWb is built on to add functionalities to our platform and mobile application Q4 2021-Q1 2022.
